

Break-Out Session 4

Meeting the Energy Efficiency Challenge

Claude Loréa, CEMBUREAU

Challenges

- Raise awareness vis-à-vis energy efficiency challenge in the mineral industry (inside/ outside: downstream...in-use)
- Availability of local raw materials is an opportunity to meet the energy efficiency challenge
- Expand focus to in-use phase (80-20)

Objectives

- Adopt a common framework from design phase to end-of-life
- Broaden efficiency drives in production of building materials – e.g. fuel consumption
- Target and enable stakeholders (downstream users, policy-makers, designers and consumers) to achieve Sustainable Construction :

Next steps

- Data gathering
- Research & Development
- Training : coherence, cooperation and understanding
- Communication
 - Internally first,
 - then externally...
